Convenient & Affordable

The convenience of two landmark ingredients in one intense formula.

RLV Protect is the culmination of years of research and development that combines two powerhouse health ingredients – LunaRich X and hemp – in a synergistic formulation using nano-technology, to bring you the most advanced and innovative wellness product in the market today.

–Dr. Alfredo Galvez

- Only hemp product formulated with lunasin. This exclusive ingredient combination works synergistically for optimal health and immune function.*
- Dual-action formula combines the immediate benefits of hemp (immune support and endocannabinoid system) with the rapid and long-term benefits of lunasin (epigenetics and cellular health)*
- Small particle size using nano-technology improves bioavailability and allows lunasin to be absorbed rapidly and more deeply into tissues*
- Combines cutting-edge and patented technologies
- Broad Spectrum hemp – all the cannabinoids and terpenes without the THC

*Lunasin is at the forefront of nutrition research and is the most studied bioactive peptide in health sciences. It has multiple health benefits because it works at the cellular level to activate genes that promote health and silence dysfunctional genes. Lunasin is the first food ingredient identified to promote cellular health through a novel epigenetic mechanism of action.**
