

your nutritional approach to joint health

A Movement in Joint Health

Our joints are the center of every move we make. But more and more people report some type of joint problem. These joint issues make it difficult to maintain an active lifestyle — whether you're a world-class athlete or simply finding it harder to move freely as you age.

Fortunately, science has discovered an array of nutrients that provide nutritional support for joints. You could mix and match bottles of vitamin pills. Or, you can get optimal levels of more than 20 powerful ingredients in one convenient, highly absorbable Arthaeffect® shake.

Nutrition Breakthrough

Arthaeffect combines the best traditional Eastern herbal therapies with cutting-edge nutrients to provide nutritional support for joints.

Arthred®: (Hydrolyzed Collagen) consists of the same series of amino acids that help regenerate damaged cartilage.

Microlactin®: (Milk Protein) A special patented component from milk protein with over 32 clinical trials to date. It has been shown to significantly help prevent joint stiffness and provides joint comfort.

Ashwagandha: herb that helps reduce joint swelling and relieves discomfort.

Dual Action

Arthaeffect may also provide prevention for the future — allowing you to maintain your healthy, active lifestyle.

Short-term. Greater comfort means you can continue to move freely.

Long-term function. Whether you're a marathon runner or a casual golfer, your joints will suffer wear and tear over the years. Arthred works to protect against deterioration by enhancing the body's ability to improve existing collagen and cartilage.

Reliv products are not intended to diagnose, treat, cure or prevent any disease or medical condition. Vitamin supplements should not replace a balanced diet.
