

# Testimonial

Gerry is a 1-year old little boy. He was only 7 pounds and suffering from severe malnutrition when Gerry's mother enrolled him in a Reliv nutrition program. Reliv NOW® for Kids was added to his diet. After 8 months Gerry has gained weight and is no longer at risk.

Jefferson is a 1-year old little boy with low weight and height and skin irritations. After just one year, there was dramatic improvement. There has been muscle mass improvement and his eyes and skin have cleared up.

Rodlin is the son of a 14-year-old mother. Dr. Manno of Haiti saw the sores and edema and was sure it was malnutrition, and gave him Reliv NOW® for Kids. After one month, the difference was shocking. This picture was taken two months after his first visit to the clinic. This little boy now lives a normal life and is growing and healthy.

# Testimonial

Brix was a severely malnourished child who has recovered after 6 weeks of receiving Kids' NOW®.

Brix is just 1 year/6 mos. old. There are 8 in the family and Brix is the youngest. His father is a farmer, planting bananas and pineapples and his mother is a scavenger.

Both parents were very cooperative and have followed instructions on how RELIV should be taken by Brix to get its optimum result. His skin and eyes are bright and the weight gained is truly amazing.
