*LunaRich is helping me be proactive about healthy aging. I love that it defends against cellular aging and it may help me manage my weight!**

— Lou Ann P.

WHAT TO SAY

”

Reliv, and the world, are looking at aging differently today. The focus has shifted toward healthy aging, which means taking control of how you age. It isn't about reversing the aging process, but instead, optimizing your state of health so your health span matches your life span. It's never too late — or too early — to take control of your own aging journey.

LunaRich, which contains liquid lunasin, is a Reliv exclusive patent-pending formula developed by harnessing the new scientific knowledge we have around epigenetics and the understanding of which lifestyle factors speed up cellular aging so we can proactively interrupt the aging process.

- Reliv's innovative healthy aging solutions combine science-based nutrition with the power of nature to optimize the aging process
- LunaRich contains liquid lunasin, the first dietary ingredient identified with a known epigenetic mechanism to act on the pathways involved in aging
- Each dropper of LunaRich contains the bioavailable lunasin content of more than 6 LunaRich X capsules in a delicious vanilla flavor
- It's never too late — or too early — to take control of your own aging journey
